

EXPERIMENT 1

Develop and design a mobile application to change background color

Aim:

To Develop and design a mobile application to change background color.

Procedure:

1. Open Figma.
2. Start a new design file.
3. Choose the size for your design or frame size.
4. Add and arrange text, images, and other elements.
5. Select the frame.
6. Find the “Fill” option.
7. Choose a new color or enter a hex code.
8. Save your design elements in the desired format.

Output:

The Screenshots of the Output is attached in the next page.

Result:

Using Figma, a mobile application is developed and designed to change background color.
